Literature Review Feedback

Report author:______________________________________________________________

1. **Skim the literature review to get the gist of what it is about.**
2. **What is the importance of this research?** Is there a clear, big-picture importance of the research at the beginning?

3. **Are several of the most closely related studies carefully reviewed in detail**- including what they did and found?

4. **Are the relevant techniques reviewed in the context of the research problem being tackled?**

5. **Does the lit review clearly point to the need to do additional research?**

6. **Does the last paragraph demonstrate a clearly outline the study that will be proposed?**
7. **If you are familiar with the literature, does the lit review focus on the most relevant literature?** Are there studies missing that should be present or studies mentioned that are unnecessary?

8. **Read the lit review in detail. Write on the paper correcting spelling, grammar, organization, etc.**

9. **Provide comments on organization of lit review.**

10. **Positive feedback** - What aspects of the lit review were effectively communicated? You MUST say something nice, truthful, and thoughtful!

11. **Constructive feedback** - How can the authors revise the lit review to make it more effective? These suggestions can be general or specific. But, you must provide suggestions for improvement.
